

Printable Daily Puppy Schedule

- **Wake up-** Potty time! The first thing you should do when your pup wakes up is let them outside for a potty break. Make time to play with him after he's done his business.
- **Breakfast-** Feed your puppy and give him fresh water.
- **After breakfast-** Your puppy may need to relieve himself again, but after that spend some time playing with him. Even though you may be getting ready for work or school, give your dog some time to play ball or fetch.
- **Mid-Morning-** Nap time. When you leave for work your puppy will generally nap. Be sure your dog is in their crate when you leave or locked away somewhere safe, as puppies tend to get into mischief.
- **Noon-** repeat early morning schedule. Potty break, lunch, potty break. This would be a good time to walk your dog or play with him outside. Burn some of their energy before you head back to work.
- **Mid-afternoon-** As you arrive home from work immediately take your pup outside to potty again. This is a good time to train, socialize or play with your pup.
- **Dinner-** time for food! Feed your pup (preferably before 6pm) and give him fresh water. Make sure to take him outside when he's finished eating.
- **Evening-** Another potty break. Take your pup for another walk or let them play with their ball before bed. It may take your dog some time to settle down before he goes to sleep.
- **Puppy Bedtime-** Remember to let him out again before bedtime. If your dog doesn't sleep through the night yet, set an alarm or be sure to hear him in the middle of the night so you can let him out again.
